

RUF Diamond Parts Portal — Work Prep Brief

****Prepared for:** Athif Shaffy**

****Sources:**** Gmail threads + Google Drive (facts only)

****As of:**** Thu Sep 3, 2026 (ET)

1. What the project is

RUF Diamond wants an ****in-house spare parts portal**** to replace (or eventually replace) the current third-party ****Intelli Catalog**** system (``rufdiamond.intellicatalogue.com`` / ``fattruck.intellicatalogue.com``).

****Goals:****

- Own the parts database and schema (not vendor-locked)
- Direct updates by RUF staff (pricing, descriptions, diagrams, serial breakpoints)
- Canadian hosting / data residency
- Cover three brands: ****Fat Truck****, ****Batch Plant (Agilis)****, ****IronHorse****
- Customer catalog with exploded diagrams + hotspots, search, and request/ordering flow (CSV export)
- Future: Xero integration for POs / single source of pricing (Phase 2)

****Pilot model:**** FAT TRUCK ****FT3 Wagon**** (Andres: IronHorse DB not ready yet).

****Current demo (Aug 11, 2026):****

<https://ruf-diamond-parts-portal.vercel.app/signin>

- Any username/password works
- Real FT3 Wagon export data
- Multi-highlight demo: Filters → FIG 1.1 → part ``56-00007`` lights two markers
- CSV export on request list
- Incomplete: only FT3 Wagon; only Filters section has a figure; drawing is a ****placeholder****; admin side separate

****GitHub:**** ``DGhale01/RufDiamond-Parts-Portal`` and

Matthias Valero	OVHcloud Sales	`matthias.valero@ovhcloud.com`

3. Timeline (ET)

When	What
May 27	Deepshika intros Athif to Daryl (hackathon)
Jul 10	Spare_Parts_Portal_Proposal docs
Jul 14	Andres 8-point feedback + FT3 Excel
Jul 17	Andres: get ThinkOn + OVH quotes in Ruf Diamond Ltd name
Jul 20–21	ThinkOn call; quote 302387
Jul 23	Andres TCO questionnaire
Jul 24	OVH VPS-3 recommendation
Jul 26–27	Project Details PDF + architecture + Figma to Andres
Aug 7	GitHub invites
Aug 11	V01 demo shipped
Aug 12	**PAUSE** until Andres PPT
Aug 31	Athif–Deepshika working session
Sep 2	FT3W schematics zip + Rev.2 catalog; PPT still "soon"

4. Andres feedback → answers

1. Multi-highlight every occurrence → yes; demoed `56-00007`
2. Xero later → Phase 2
3. Excel seed from Intellinet → mapped
4. Backup/recovery → WAL + nightly + 3-copy
5. Access by brand + discounts → yes

6. Pilot FT3 Wagon → yes
7. Iterative enhancements → yes
8. TCO → OVH ~\$34/mo vs ThinkOn ~\$475/mo

5. Current status

- **V01 live** but **dev on hold** since Aug 12 waiting Andres PPT
- **FT3W schematics received Sep 2** — review quality/titles/nomenclature
- Hosting lean: **OVH VPS-3 ~\$34/mo CAD**; ThinkOn ~\$17.5k / 3 yr
- Open: is a submitted request a **PO or quote**?

6. Hosting numbers

ThinkOn Quote 302387: ~\$474.89/mo + \$465.36 setup ≈ **\$17,561 / 3 yr** (VPC, pfSense, backups; MSP not included)

OVH VPS-3 stack (~CAD excl tax):

- VPS-3 \$16.83 + backup \$1.80 + snapshot \$0.50 + object storage \$15 = **\$34.13/mo** (~\$409.56/yr)
- 3-yr ~\$1,228 vs ThinkOn \$17,561

7. Likely next work for Athif

1. Review FT3W schematics (Sep 2 zip + Rev.2 catalog)
2. Wait/prep for Andres PPT — no major new scope until alignment
3. Map schematics → callout coordinates after go-ahead
4. Clarify PO vs quote request
5. OVH exact quote/provisioning in RUF name
6. Simplify security/incident docs
7. Keep V01 ready to pivot
